

Learning How to Say It: Language Generation post Deep Learning

Alexander M Rush

Part 4: Deep Latent-Variable Models

Deep Latent-Variable Models

Goal: Extend text generation to Expose specific choices as *discrete* latent variables.

$$p(y, z|x; \theta).$$

Deep Latent-Variable Models

Goal: Extend text generation to Expose specific choices as *discrete* latent variables.

$$p(y, z|x; \theta).$$

- y is our text output sequence
- z is a collection of latent variables
- θ are the neural network parameters.

Example Model: Mixture of RNNs

Generative process:

- 1 Draw cluster $z \in \{1, \dots, K\}$ from a Categorical.
- 2 Draw words $y_{1:T}$ from RNNLM with parameters π_z .

$$p(y, z|x; \theta) = \mu_z \times \text{RNNLM}(y_{1:T}; \pi_z)$$

j

Posterior Inference

We'll be interested in the *posterior* over latent variables z :

$$p(z | y, x; \theta) = \frac{p(y, z | x; \theta)}{p(y | x; \theta)} = \frac{p(y | x, z; \theta)p(z | x; \theta)}{\sum_{z'} p(y | x, z'; \theta)p(z' | x; \theta)}.$$

Posterior Inference

We'll be interested in the *posterior* over latent variables z :

$$p(z | y, x; \theta) = \frac{p(y, z | x; \theta)}{p(y | x; \theta)} = \frac{p(y | x, z; \theta)p(z | x; \theta)}{\sum_{z'} p(y | x, z'; \theta)p(z' | x; \theta)}.$$

How?

- Sum out over all discrete choices (e.g. run K RNNs).
- Variational inference based methods.

Application: Summary with Copy-Attention

(Gu et al, 2016) (Gulcehre et al, 2016)

Let z be a binary latent variable.

- If $z = 1$, let the model generate a new word.
- If $z = 0$, let the model copy a word from the source.

Inference:

Pointer-generator model + coverage summary

francis saili has signed a two-year deal to join munster later this year .
the 24-year-old was part of the new zealand under-20 side that won the junior world championship in italy in 2011 .
saili 's signature is something of a coup for munster and head coach anthony foley .

(See et al, 2017)

Latent Variable Models for Generation

Ongoing Work: Can we develop other discrete latent-variable models for generation?

Goals:

- Model Control
- Model Debugging
- Model Uncertainty

Example: Learning Neural Templates for Generation

MR

name[The Golden Palace], eatType[coffee shop], food[Fast food],
priceRange[cheap], customer rating[5 out of 5], area[riverside]

Reference

A coffee shop located on the riverside called The Golden Palace,
has a 5 out of 5 customer rating. Its price range are fairly cheap
for its excellent Fast food.

Standard Approach

Step 1: Encode the Source

Fitzbillies,type[coffee shop],price[< £20],food[Chinese],rate[3/5],area[city centre]

Step 2: Generate with RNN Decoder

Fitzbillies is a coffee shop providing Chinese food in the moderate price range . It is located in the city centre . Its customer rating is 3 out of 5.

Issues

- ① Interpretable in its content selection?

Decisions may come from anywhere in the source x .

- ② Controllable in terms of style and form?

Rely on a learned system to determine content.

Neural Template Generation Approach

Step 1: Encode the Source

Fitzbillies,ty[coffee shop],pr[< £20],food[Chinese],cust[3/5],area[city centre]

Neural Template Generation Approach

Step 1: Encode the Source

Fitzbillies,ty[coffee shop],pr[< £20],food[Chinese],cust[3/5],area[city centre]

Step 2: Select a Template

The _____ is a _____ providing _____ food _____ in the _____ high _____ price _____
 _____ is an expensive _____ serving _____ cuisines _____ moderate _____ price range _____

 . | It is located in the _____ Its customer rating is _____
 | located near _____ | Their customer rating is _____
 | near _____ | Customers have rated it _____ out of _____ | .

Neural Template Generation Approach

Step 1: Encode the Source

Fitzbillies,ty[coffee shop],pr[< £20],food[Chinese],cust[3/5],area[city centre]

Step 2: Select a Template

| | | | | | | | | |
|-----------|----------------|--------------|-----------|-------|--------------------------|--------------------|-------------------|-------------|
| The _____ | is a | _____ | providing | _____ | food | in the | high | price |
| _____ | is an | _____ | serving | _____ | cuisine | _____ | moderate | price range |

Technical Methodology: Hidden Semi-Markov Model

- HMM: discrete latent states with single emissions (e.g. words).
- HSMM: discrete latent states produce multiple emissions (e.g. phrases).
- Parameterized with *transition*, *emission*, and *length* distributions.

Technical Methodology: Neural Hidden Semi-Markov Model

- Employ HSMM as a conditional latent variable language model, $p(y_1, \dots, y_T, z \mid x)$.
- Transition Distribution: NN between states.
- Emission Distribution: Seq2Seq+Attention, one per state k .

Technical Methodology: Learning Templates

- Fit model by maximizing log-marginal likelihood on training data.

$$\max_{\theta} \sum_j \log \sum_z p(y^{(j)}, z \mid x^{(j)}; \theta)$$

Details: Pre-score segmentations, HSMM forward algorithm for sum, backprop with autograd, all inference is exact.

Technical Methodology: Learning Templates

- Fit model by maximizing log-marginal likelihood on training data.

$$\max_{\theta} \sum_j \log \sum_z p(y^{(j)}, z \mid x^{(j)}; \theta)$$

Details: Pre-score segmentations, HSMM forward algorithm for sum, backprop with autograd, all inference is exact.

- Compute argmax segmentations to find common *templates*.

$$z^{(j)} = \arg \max_z p(y^{(j)}, z \mid x^{(j)}; \theta)$$

[The Wrestlers]₁₈₅ [is a]₂₉ [coffee shop]₁₆₄ [that serves]₁₈₈ [English]₁₃₉ [food]₁₈ [in the]₃₂ [moderate]₁₂₅ [price range]₁₈₀ [.]₉₀

Issue 1: Interpretability

kenny warren

name: kenny warren, **birth date:** 1 april 1946,

birth name: kenneth warren deutscher, **birth place:** brooklyn, new york,

occupation: ventriloquist, comedian, author,

notable work: book - the revival of ventriloquism in america

1. kenny warren deutscher (april 1, 1946) is an american ventriloquist.
 2. kenny warren deutscher (april 1, 1946 , brooklyn,) is an american ventriloquist.
 3. kenny warren deutscher (april 1, 1946) is an american
ventriloquist, best known for his the revival of ventriloquism.
 4. "kenny" warren is an american ventriloquist.
 5. kenneth warren "kenny" warren (born april 1, 1946) is
an american ventriloquist, and author.
-

Issue 2: Controllability

The Golden Palace

name[The Golden Palace], type[coffee shop], food[Chinese],
priceRange[cheap] custRating[5 out of 5], area[city centre],

1. The Golden Palace is a coffee shop located in the city centre.
 2. In the city centre is a cheap Chinese coffee shop called The Golden Palace.
 3. The Golden Palace that serves Chinese food in the cheap price range. It is located in the city centre. Its customer rating is 5 out of 5.
 4. The Golden Palace is a Chinese coffee shop.
 5. The Golden Palace is a Chinese coffee shop with a customer rating of 5 out of 5.
